About Us

Indigo's experienced health professionals help people of all ages choose and access equipment, technology and services for their independence and wellbeing.

We offer services across Australia and manage the National Equipment Database (NED), the nation's largest assistive devices database with more than 50,000 products available for people to search, find and buy. In addition, Indigo is the national provider of the Australian geat2GO service funded under the Commonwealth Home Support Program.

Key services include:

- Assistive technology (devices and equipment) advice, assessment, prescription and provision
- Allied health (occupational therapy, physiotherapy and speech pathology) services
- Home Modifications
- Services for schools to assist students participate and learn, and
- Professional training.

OUR VISION

A community where everyone is able to make genuine and informed decisions on how to live independently.

OUR PURPOSE

To provide affordable, individualised and nationally competitive allied health, assistive technology and home modification solutions to enable and enhance independent living in the community.

OUR VALUES

INTEGRITY:

Carry out agreed actions through honest communication, efficiency and extensive knowledge.

PASSION:

Showing that we believe in what we do through warmth and enthusiasm.

CREATIVITY:

Having the courage and willingness to explore alternative options and the commitment to give things a go.

TOGETHER:

We are not all the same, we are equal; and our commitment is to work in partnership with others.

24/25 Year in Review

275 equipment requests

for geat2GO service supported via telehealth

8.6/10

Our geat2GO customers recorded an average satisfaction rate of 8.6 out of 10 on our overall performance

813,682

Social media reach of 813,682 with a 10% increase on engagement across all platforms

All first year students from Curtin's Occupational Therapy and Speech Pathology courses received Assistive Technology Experience Sessions delivered by Indigo Occupational Therapists and Speech Pathologists, along with physiotherapy students from Japan's Josai International University.

77 updates to the geat2GO platform bringing process improvements and new functionality to the service

1.2M

Over 1.2 million page views of National Equipment Database across 155,000 users and more than 10,000 clicks on our Information and Advice line pop-up.

GEAT2GO Mats that matter

Clinical considerations for fall-prevention tools

Presented to you by GEAT2GO

1,645 registered attendees for geat2GO Information Webinars

with topics including anti slip mats, walking aids, toileting aids, portable ramps, and personal alarms.

1,256 clinical reviews

completed for geat2GO complex equipment requests and Home Care Package Emergency Funding requests

Home modifications were provided to 781 people to support ageing in place and increase safety

24/25 Year in Review

Occupational Therapy, Physiotherapy and Allied Health assistance provided to **2,714 people** by the Allied Health team, delivering **17,532 hours** of therapy service.

40% of staff survey respondents identify from CALD backgrounds (culturally and linguistically diverse) **8% of employees report having lived experience of disability.** Our ability to provide culturally safe, person-centred support is enhanced through this diversity.

NED equipment offer increased to over **50,000** from over **4,000** suppliers

86,000

Nearly 90,000 visitors to the Indigo website who viewed over **240,000 pages**

7.4/10

An impressive culture score of 7.4 out of 10 with overall engagement of 73% in our most recent survey

Indigo's clinical excellence team responded to **2,491** phone enquiries from allied health professionals

Over 210,000 helpful assistive devices and equipment were provided to over **72,000** people Australia-wide through the Australian Goods Equipment and Assistive Technology service (geat2GO)

In line with our Reconciliation Action Plan (RAP) and our commitment to inclusive practice, we continue to prioritise initiatives that create equitable access and belonging for all employees. This year we joined the **Welcome Here Project**, signalling our commitment to visibly supporting LGBTQ+ staff and clients.

8,499

8,499 participants continuing in the Indigo/ Monash University Longitudinal Study exploring use and effectiveness of **1,370 different types of AT** in older Australians.

Annual Report Foreword

Indigo operations has continued to build and grow over the course of 2024/25, with a focus on preparing for sector changes under the new Aged Care Act, which comes into effect towards the end of 2025.

The national geat2GO program was once again expanded, providing us the ability to service more clients than ever throughout the year, with over 210,000 helpful assistive devices and equipment being provided to over 72,000 people Australia wide. Importantly, these clients reported an average satisfaction rate of 8.6 out of 10 on our overall performance, a huge testament to the dedication and professionalism of our staff and the program as a whole.

Our Aged Care team continued to deliver Commonwealth Home Support Program services, while the Disability Services and Quality Teams conducted a NDIS verification audit to secure registration renewal for the next three years.

Our partnership with Monash University also continued, with nearly 8,500 participants still participating in the joint longitudinal study exploring the use and effectiveness of Assistive Technology in older Australians. The study is drawing to a close, with one final survey due to be completed at the 24-month mark in February 2026 to finalise the data gathering stage of the study. We look forward to the project results from Monash once all data has been analysed.

The year also brought about a new look and feel for the Indigo brand, with a Masterbrand application across the National Equipment Database (NED) and geat2GO service bringing a cohesive and consistent approach to how we present our organisation. Our core purpose as 'Champions of Independence' being the focal point around which all future messaging will revolve.

The process included a new Indigo website which was launched in mid-January, displaying new brand look and feel, revised content and updated imagery and all feedback suggests that the refreshed branding has been well received.

The Nedlands Experience Centre underwent a revamp process, with new and revised products and enhanced processes to manage stock and product information to assist therapists and clients in viewing and trialling available equipment. Our thanks to our geat2GO Supply Partners for their continued support and provision of contemporary products to furnish this display.

The space was given a facelift, with new brand colours and display screens along with elements that celebrate our rich

history and our founder Freda Jacob. The way we carry on her legacy in the important role of enhancing knowledge of assistive technology and its benefits across the broader community remains as important to us today as it ever has. The revamped centre has been officially launched and is now open for booked appointments with clients and service providers.

Across all areas of the organisation, we continue in our preparations for legislative changes and new responsibilities under the Aged Care Act. With Providers subject to additional requirements in sourcing assistive technology on behalf of their clients, we have extended our geat2GO platform to provide a service targeting their needs, and we look forward to further refining this offer over the coming months.

As we respond to operational requirements of today and make preparations for the changes of tomorrow, we continue to be impressed with the calibre of work and commitment demonstrated by staff and commend them for their work ethic across difficult times of change and uncertainty. We shouldn't and don't underestimate the challenges that may come through the legislative changes but are confident that we are in best possible position to adapt and again grow with them.

This process of resilience and preparation has been further supported by the Indigo Board and we thank them for their support and guidance, also recognising the additional benefits brought about by continuity of Board members and their collective strengths brought to governance and decision-making at the strategic level.

Key Services and Achievements

Aged Care Services

Under the Commonwealth Home Support Program, the Aged Care Services team continued to work across the three services areas of Allied Health, Home Modifications, and Goods, Equipment and Assistive Technology (GEAT) provision. The Allied Health team of occupational therapists and physiotherapists delivered 17,532 hours to 2,714 clients across Western Australia.

The Home Modifications team provided modifications to 781 clients' homes across regional and metropolitan WA. In addition, the Aged Care Services team continued to support Home Care Package (HCP) providers in delivering allied health services on an ad hoc basis, with the continuation of HCP services in the Great Southern Region (Albany).

geat2GO

Indigo continued to provide GEAT across Australia as the national GEAT provider, with over 210,000 pieces of assistive technology and equipment supplied to over 72,000 clients across the country in 2024/25. The primary purpose of the geat2GO program is to ensure equity of access to consumers, no matter where they live. It allows older people living across Australia regionally, remote, and in cities, to access helpful devices and equipment to continue living independently and make daily tasks easier.

Indigo's local GEAT program and geat2GO are both occupational therapist-led, clinical wrap-around models that provide end-to-end support to aged care assessment teams, occupational therapists, physiotherapists, and other allied health professionals around Australia with prescribing and accessing optimal assistive technology solutions for their clients. Indigo is committed to the

continuous improvement and expansion of geat2GO, which over 2024/25 included the delivery of significant platform and procurement process improvements. Indigo has been confirmed as the national GEAT provider during 2025/26, in line with extensions for CHSP providers to enable continuity of services with the delayed introduction of the Support at Home program.

geat2GO AT expansion

Indigo identified an opportunity to expand the geat2GO platform to assist Aged Care Providers in managing their participants' Assistive Technology and Home Modifications (AT-HM) budget.

The expanded platform offers Providers the opportunity to manage AT Scheme funding purchases using Indigo's established supply systems and clinical know-how on equipment suitability. Benefits include pre-filtered inclusions list products displayed according to prescriber type, facility for Provider approvals before purchasing, generation of service agreements and the opportunity for client selection and request of low-risk items. Supply Partner agreements have been extended to suppliers offering products on the inclusions list, with information sessions on the platform attracting more than 1,000 registrations.

The platform will continue to be enhanced according to user feedback and emerging Provider requirements under guidelines to be released prior to the commencement of Support at Home.

Key Services and Achievements

Quality and Compliance Audits

Indigo underwent its NDIS re-verification audit in March, with the consequent audit report identifying full conformance across all verification modules, and the report has been submitted to the NDIS Quality and Safeguards Commission for registration renewal for the following three years.

Together with an external auditor, an audit of Indigo's CHSP services was completed with Indigo clinicians to review and identify opportunities for improvement in client assessment and care planning, and alignment with Indigo's service delivery models. No major non-conformances were found and identified opportunities were added to Indigo's plan for continuous improvement.

Following completion of the Complaints Management desktop audit in October, several improvements were made to Indigo's Feedback Management System to better align the record process workflow with the Complaint Management Procedure.

Clinical Excellence

The Clinical Excellence team continued their work as an organisational resource for both clinical governance and support, in particular our GEAT programs and the National Equipment Database.

Key services included information and advice on assistive technology to clients and service providers, facilitating telehealth services to assist with equipment prescriptions for individuals unable to access allied health services

in their local area, reviewing and updating equipment descriptions and educational content on the Indigo websites, assessing the clinical rationale for complex equipment requests and HCP Emergency funding applications, and conducting follow-up calls with clients post-equipment delivery.

The team also initiated a series of educational webinars aimed at service providers, focusing on the clinical considerations for equipment prescription to further enhance clinical best practices within the geat2GO program. Topics covered included personal alarms, toileting equipment, walking aids, and non-slip mats.

The Equipment Review Group continued their role in the assessment and selection of new products appropriate for programs across Indigo operations, with feedback from clients and service providers regarding both equipment and services resulting in several service improvements across the organisation.

A comprehensive process to review, update and catalogue equipment at the Indigo Experience Centre in Nedlands was completed, with the space now open for appointments to enable clients and service providers to view and/or trial assistive technology and receive information and advice - both in person and via telehealth video calls.

Education Partnerships

Indigo continued its support for the education and professional development of students in Occupational Therapy and Physiotherapy through the delivery of information sessions and seminars. Indigo partnered with Curtin University in delivery of assistive technology sessions for students from both Curtin and Japan's Josai University as part of their curriculum.

Indigo again hosted students on clinical placements and welcomed new graduates to the organisation. In addition, our partnership with UWA and the McCusker Centre for Citizenship carried on with two students completing special projects as part of their internship program.

Key Services and Achievements

Monash University Longitudinal Study Partnership

Indigo continues its partnership with Monash University with funding through the Commonwealth Department of Health, Disability and Ageing; with Indigo staff collecting data for the two-year longitudinal study evaluating the use and effectiveness of assistive technology (AT) for older Australians within the national Goods Equipment and Assistive Technology (GEAT) service.

Questionnaires have been completed at the three, six, 12 and 18-month time periods following receipt of items ordered through geat2GO, with a final questionnaire due at the 24-month mark to complete the data.

Across the 2024/25 financial year, Indigo staff completed 8,499 questionnaires, with the average questionnaire taking 20 minutes to complete. Reasons for participant attrition over the course of the study include ineligibility to continue if a participant moves on to a Home Care Package or residential care, declining to participate or unable to contact across two consecutive questionnaire periods.

A joint presentation of interim findings outlining participant demographics and levels of disability according to ABS

categories was delivered by Indigo and Monash University representatives at the national Occupational Therapy Australia Conference held in June.

Marketplace and e-Commerce Team (MET)

The Marketplace and e-Commerce Team continued development of Indigo's e-commerce platform that underpins the National Equipment Database (NED), geat2GO and the geat2GO AT expansion servicing Providers under Support at Home, with a number of application programming interfaces (APIs) delivered by the technical team together with the Digital Services team. In addition to platform enhancements, MET continues to facilitate product data upload, testing and supplier connection to e-commerce functionality for new products and suppliers; bringing the total equipment offer to over 50,000 from over 4,000 suppliers.

Brand Refresh and Brand Awareness Marketing Campaign

Led by the Marketing and Communications team, the organisation underwent an extensive process to refine and enhance Indigo's brand to bring about a cohesive approach to the articulation of the organisation's purpose and promotion of Indigo products and services. The resulting strategy led to development and implementation of a Masterbrand approach, centered on Indigo's history and origins with founder Freda Jacob and our ongoing purpose in being Champions of Independence. New branding was implemented across all Indigo, geat2GO and NED touchpoints with a new website and domain name delivered for Indigo. An integrated marketing campaign to increase awareness of the Indigo brand values and new design elements was rolled out across the Perth metropolitan area in June.

Key Services and Achievements

People and Culture

Indigo maintained focus on People and Culture initiatives, recognising that our employees are our greatest asset. Indigo had 33 new starters welcomed through a comprehensive induction program including additional resources and tailored supports for those in remote roles to ensure these team members remain connected, equipped, and engaged.

Continued development of the wellbeing program included the employee fair 'Healthy, Wealthy and Wise', corporate partnerships, healthy initiatives, flexible workplace policies and staff development processes to support an employer of choice approach.

Our 2025 Workplace Gender Equality Report demonstrated a negligible gender pay gap, with results slightly favouring women, an encouraging outcome when compared with industry benchmarks. We are proud to report that we maintain a higher-than-industry average of female representation in management roles, alongside strong gender balance at the executive level. Leaders and emerging leaders across the organisation have actively engaged in professional development opportunities, reflecting a shared commitment to building a capable, inclusive, and future-ready leadership team.

Digital Services

Indigo's Digital Services team continued to provide support for Indigo and iLA through Development Projects, Business Intelligence and Reporting, as well as traditional ICT functions, including hardware/software, technical support, and cybersecurity. Security-focused activities maintained the organisation's position as an industry leader in this space, with an external audit confirming the two organisations have reached Essential Eight Maturity Level 1. Further enhancements were delivered in activities relating to security operations and adaptation of Artificial Intelligence tools.

The team delivered significant upgrades to key systems, further expanding Call Centre, Fleet and contract managements capabilities. Development to enhance the geat2GO platform continued, with additional activity to expand this digital offering to service Providers under the new Support at Home model.

Data governance was significantly increased through introduction of a dedicated committee guiding activity across both Indigo and iLA.

Business Solutions

The Business Solutions team continued its roles in the provision of procurement, contract management, sales and project management support. Significant activities included implementation of improved systems for contract, fleet and asset management and process updates for fleet, office management and travel. Six Request for Proposals for geat2GO were conducted over nine categories, which reviewed 840 product ranges and resulted in updates to 232 products. Three new APIs were delivered to connect our systems to our Supply Partners and deliver process improvements in automated ordering. Business Development activity relating to the geat2GO AT expansion offer resulted in seven supply partner memberships, and the Business Solutions team also contributed to strategic projects to revamp the Indigo Experience Centre and refresh the display product range.

Events and Expos

Indigo continued our customer and stakeholder engagement through participation in industry events and expos. The Disability and Marketplace and eCommerce team attended Source Kids and Disability Connection Expos, showcasing assistive technology together with promotion our services and the National Equipment Database.

Indigo staff attended a number of national events to raise awareness of the geat2GO expansion offer servicing Aged Care Providers, including state-based conferences held by Ageing Australia and national summits held by Council on the Ageing.

Key Services and Achievements

The geat2GO expansion was showcased locally at the ATSA Expo held at the Claremont Showgrounds, together with promotion of Indigo's therapy and assistive technology services.

In June, Indigo supported Occupational Therapy Australia as silver sponsor of the sector-leading national conference for occupational therapists. This three-day event allowed Indigo staff to share assistive technology solutions with attendees from across Australia, promoting Indigo services, the geat2GO AT expansion and our National Equipment Database.

Indigo CEO Steve Glew and Marketplace and eCommerce Manager Sacha Marchant travelled to Germany in September to attend the 2024 REHACARE Expo and meet with EASTIN, an international assistive technology database network, for a week of learning, collaborating and exploring AT.

EASTIN is a global network of assistive technology databases and aims to bring awareness to and promote the spread of information about assistive technology products around the world, and Indigo was immensely proud to be able to present our company and our National Equipment Database (NED) to EASTIN as a representative of Australia and its developments in assistive technology.

Indigo also attended REHACARE, the International Trade Fair for Rehabilitation and Care while in Germany. Steve and Sacha were two of 44,000 visitors from 85 countries, and they were able to explore the amazing innovations in assistive technology from 950 exhibitors representing 40 different countries.

Experience Centre Revamp

Business areas across Indigo came together to facilitate a revamp of the Indigo Experience Centre in Nedlands.

A comprehensive process to review, update and catalogue equipment was undertaken with new asset management systems installed and refreshed items provided courtesy of geat2GO supply partners.

The space was given a facelift with new brand colours, display screens and elements that celebrate our history with founder Freda Jacob, Indigo's commitment to promoting independence and the emotive benefits assistive technology can bring to people's lives.

The space is now open for appointments to enable clients and service providers to view and/or trial assistive technology and receive information and advice - both in person and via telehealth video calls.

Organisational Structure

Indigo Operations

Indigo Office of CEO/Corporate Services

Organisational Structure

Our Executive Team

Indigo's Executive Team makes operational decisions for the organisation. Following a restructure in December 2022, additional service areas were created to reflect our operations across GEAT as the national provider of

geat2GO and management of the e-commerce platform used across geat2GO, iLA's Live Up program and the National Equipment Database (NED).

CHIEF EXECUTIVE OFFICER
Steve Glew

Steve joined Indigo as the Chief Executive Officer in March 2018. Steve brings a wealth of experience to the role having worked in senior executive positions for more than 15 years. Prior to his appointment at Indigo, Steve was an Executive Director at the Department for Child Protection and Family Support and has held roles at the Department of Education and Training where he gained experience managing teams working with the disability sector.

CHIEF OPERATING OFFICER
Peter Byrne

Peter has over 20 years of experience in the public sector with Senior Executive roles in Finance, Corporate Services and Information Technology. Peter has extensive experience in financial management, corporate governance and public policy, and has led direct service delivery functions in the areas of child protection, remote Aboriginal communities and emergency welfare response.

PRINCIPAL ADVISOR
AGED CARE

Joanne Lister
A highly successful Management Professional with a track record of delivery in the Aged Care, Disability and Health industries, Joanne has 30 years' experience in the not for profit sector with portfolios covering all regions of Australia including remote and regional areas.

Teams and Services

Aged Care Services

Facilitates services funded under the Commonwealth Home Support Program across three separate areas.

Allied Health services comprise Occupational Therapy and Physiotherapy with individual services. The Allied Health service assesses consumers and puts plans in place to maximise their independence and connection within the community with a wellness and reablement focus. This may include the instigation of exercise programs to increase strength, organising and training in the use of assistive technology, or arranging for modification of the client's home environment through home modifications.

Allied Health services are available state wide, with telehealth provided in remote and rural Western Australia.

The Home Modifications service provides modifications in all rural areas and South West Metropolitan Perth. Types of modifications include the fabrication and installation of rails, ramps, platform step and minor modifications to the home.

The Goods, Equipment, and Assistive Technology services provide equipment prescribed by assessors, occupational therapists, physiotherapists, and speech pathologists across all aged care planning regions in Australia through our geat2GO portal. The types of products include small devices to assist in daily activities of living such as dressing aids; to personal alarms for safety, security, and independence; all the way through to more complex equipment such as mobility and showering aids.

Disability Services

Offers services to clients under the National Disability Insurance Scheme (NDIS) or people with disability seeking self-funded services. The team consists of health professionals in the areas of Occupational Therapy, with individual services including assessment and advice to clients on the many ways in which to regain and maintain functionality and independence in their lives. These may include changes to the home environment or advice on performing everyday activities, advice, and provision of aids and technology to suit individual needs.

Teams and Services

Clinical Excellence

Created to ensure services are provided at the highest quality and follow best practice in implementation of clinical governance and clinical support activities.

Providing a centralised resource across the organisation for both clinical governance and support, this team is comprised of physiotherapists and occupational therapists.

Clinical support includes the provision of information and advice on assistive technology to clients and service providers via phone and email, in-person and telehealth video appointments to view/trial equipment at the Indigo Experience Centre, assessing clinical rationale for complex equipment requests and HCP emergency funding requests, conducting follow up support to Goods Equipment and Assistive Technology (GEAT) clients post-delivery of equipment and developing educational material for clients and service providers.

Through the Equipment Review Group (a subcommittee of the Quality Care and Advisory Body), the team is responsible for reviewing the types of equipment and aids recommended to clients, reviewing any feedback and actioning service improvement, developing resources to support the use of equipment and testing new products.

Business Solutions

Provides expertise in procurement, contract management, project management, strategic positioning and partnerships, sales and purchasing. Working closely with all areas of service delivery, the Business Solutions team assesses the viability of new or expanded opportunities to grow the organisation and better service our clients, as well as working together with the Marketing team in facilitating a coordinated approach to stakeholder engagement.

Marketplace and eCommerce Team

Guides development of the national GEAT e-commerce platform that underpins the successful geat2GO service and the National Equipment Database (NED).

The team facilitates development of both internal and external Application Programming Interfaces (APIs) to better connect areas of operation and bring improved functionality for the platform.

In addition to support, data management and auditing across the platform for all programs, the team is responsible for management, development and growth of the NED.

Teams and Services

Digital Services

The Digital Services team reflects Indigo and iLA's growing need for software development and management of digital projects. The team comprises four key activity areas: Business Intelligence, Data Strategy and Applications; Software Application Development; ICT Operations and Cybersecurity. The team works across both Indigo and iLA to develop and support great2GO, NED, Single Assessment Services (SAS), LiveUp and Keep Able programs, with activities including software and website development and support.

Quality and Risk

Focused on revitalising Indigo and iLA's Quality Management System, the Quality team reviews and improves all areas of quality management including the organisations' feedback/incident management system, controlled document management system, continuous improvement culture, audit management, data retention and regulatory compliance.

Finance

Supports and enables the delivery of high quality and compliant financial planning and management across Indigo and iLA. Under a business partner model, the Finance team provides technical advice and professional support with budgeting, financial modelling and decision support activities for staff to assist with planning and managing financials as well as ensuring relevant compliance and legal requirements are met.

People and Culture

Responsible for ensuring that contemporary and effective recruitment, onboarding, learning and organisational development, staff wellbeing and employee relations functions are delivered across Indigo and iLA. In addition, the team leads staff engagement, workforce planning and development, coordination of Work Health and Safety and injury management as well as compliance and reporting according to legislative requirements. A current focus this year was on performance optimisation, supporting learning and leadership growth and improving change management across the two organisations.

Marketing and Communications

Responsible for development of strategies and campaigns to increase awareness of Indigo, promote activities and achievements to the broader community and encourage participation in our services. The team offers information, support and advice to individual operational areas on ways to best communicate with customers and stakeholders to develop a consistent approach to engagement. Current focus includes brand awareness activities following implementation of new brand strategy and Masterbrand approach.

Our Board

Our Board members are required to attend a minimum of eight meetings per year. They provide significant contributions to monthly Board meetings where they offer expertise in decision making and ensure that decisions align with the strategic plan of the organisation, governance practices, financial position and legal obligations. Terms of membership are staggered and each term runs for two years.
